## CPD Questionnaire: Wound Healing Vol 15 No 1

Please select only one answer for each question. For every five questions, one must achieve a minimum of four correct answers to obtain one CPD point. You can only obtain a maximum of three points for each CPD article.

### *A synopsis of how to undertake research*

#### 1. Your research project should:

- a Be very complicated
- b Interesting to you
- c Cost a lot of money

#### 2. A literature search or review:

- a Allows you to see what research has been done on this topic already
- b Allows you to build a database of relevant articles
- c Is usually where you will find the articles you will use as a reference in your paper
- d All of the above

#### 3. If somebody has already done a study to answer the question you had, it is pointless doing a similar study:

- a True
- b False

#### 4. Novel research is research that:

- a Is published in the form of a novel
- b Has never been done before
- c Is done only in multicentred studies

#### 5. Everything that is published is true:

- a True
- b False

#### 6. The following are examples of existing publication search engines:

- a PubMed
- b MEDLINE
- c Google Scholar
- d All of the above

#### 7. An open-access article implies that:

- a Only universities can download it
- b It is open to different interpretations
- c It is free to download for anybody

#### 8. What are the benefits of an electronic referencing platform?

- a Allows you to keep a database of relevant articles
- b Allows you to create a list of references automatically
- c It is useful when moving paragraphs from one part of your paper to another
- d All of the above

#### 9. The aim of a study is:

- a To give the reader an idea of what the purpose of the study is
- b The conclusion of the study
- c To tell you how the study will be done
- d All of the above

#### 10. An in vivo study is done on living tissue:

- a True
- b False

#### 11. It is easier to undertake an in vitro study because:

- a Obtaining ethics approval is easier for these than in vivo studies
- b It is more affordable
- c You don't need to get statistical significance

#### 12. If there is a variable that could influence the results of your study, you should:

- a Abort your study
- b Eliminate it as a variable by ensuring it's the same in all your experiments
- c Add other variables to it

#### 13. An underpowered study implies that:

- a The article is too short
- b There aren't enough subjects/experiments to give meaningful results or statistical significance
- c The study has too few authors

#### 14. To determine what type of statistical analyses you will use to analyse your data, it is useful to enlist the help of a:

- a Entomologist
- b Palaeontologist
- c Statistician
- d Physicist

#### 15. Obtaining ethics approval is beneficial because:

- a It ensures your study methodology is sound
- b It ensures that your study is humane
- c Many journals request this for publication
- d All of the above

#### Recipients of Wound Healing visit our CPD portal at [www.mpconsulting.co.za](http://www.mpconsulting.co.za)

- Register with your email address as username and MP number with seven digits as your password and then click on the icon "Journal CPD".
- Scroll down until you get the correct journal. On the right hand side is an option "ACCESS". This will allow you to answer the questions. If you still can not access please send your Name and MP number to [info@medpharm.co.za](mailto:info@medpharm.co.za) in order to gain access to the questions.
- Once you click on this icon, there is an option below the title of the journal: Click to read this issue online.
- Complete the questionnaire and click on submit.
- Your points are automatically submitted to the relevant authority.
